

# Treatment Approaches

## Morton's Neuroma - Acute Pain

### Approach A

**Product(s) & Dosage:** 2.2 cc Traumeel® Injection Solution mixed with 1 cc of 0.5% bupivacaine hydrochloride

**Application:** Inject peri-neurally, around the affected nerve

**Duration:** Injection may be repeated every 2 weeks for a month depending upon the patient's symptoms

### Approach B

**Product(s) & Dosage:** 2.2 cc of Traumeel® Injection Solution mixed with 1.5 cc of 0.25% Marcaine

**Application:** Ultrasound guided injections around the affected nerve.

**Duration:** Multiple injections over 2 to 3 weeks depending on symptom development
