Traumeel® Injection Solution Rx

Injection Solution Rx

NEW STUDY: Effective in moderate to severe OA-K
Combined Intra-articular knee injections with Traumeel® and Zeel® Injection Solutions provided statistically significant and clinically relevant pain relief in patients with moderate to severe knee OA as shown in a new double-blind, randomized, controlled trial.5

How it works
Traumeel® Injection Solution is a combination of dilute mineral and biological extracts. The exact mechanism of action of Traumeel® Injection Solution has not been fully elucidated.1-2 Various cellular and biochemical pathways appear to be modulated by the ingredients of Traumeel® Injection Solution, which act synergistically on the different phases of the inflammatory response.1,2 Preclinical studies suggest that Traumeel® Injection Solution inhibit the secretion of pro-inflammatory mediators, and regulate lymphocytes and their messengers.2 Traumeel® Injection Solution also appears to act by accelerating the healing process rather than blocking edema development from the start, with beneficial effects on tissue repair and wound healing.2

Products can be ordered directly from MediNatura™
- Call a customer service representative toll-free at 1-844-633-4628 Monday-Friday, 8am-5pm MST.
- Also available through medical distributors: Emerson Ecologics*, McKesson, Natural Partners
*Our preferred distributor outside of Florida

The statements in this brochure have not been reviewed by the Food and Drug Administration. They are supported by traditional homeopathic principles.
Zeel® Injection Solution is indicated for the treatment of arthrosis/osteoarthritis, and/or rheumatic joint diseases and for the relief of symptoms such as pain and joint stiffness.

Neuralgo-Rheum® Injection Solution is indicated for the treatment of nerve pain, soft tissue rheumatism and symptoms of disc protrusion.

Spascupreel® Injection Solution is indicated for the relief of spasms of the smooth musculature of the gastrointestinal and the urogenital tract as well as general muscle spasms.

Lymphomyosot®X Injection Solution is indicated for improvement of lymphatic drainage, the non-specific immune defense, and conditions such as benign hypertrophy of lymph nodes, chronic tonsillitis, tonsillar hypertrophy and lymphatic edema.

Main Characteristics of Traumeel® Injection Solution:

- Available by prescription only
- Established efficacy and safety data in multiple clinical trials that also include studies under “real life” conditions and published case-reports
- Non-Narcotic, Non-Addictive, Non-NSAID, Non-Steroid
- No known drug interactions - Easy to combine with other medications
- Excellent safety profile

Other available injections that can be combined with Traumeel®:

- Intra-articular injections of Traumeel® Injection Solution in combination with Zeel® Injection Solution provided statistically significant and clinically relevant pain relief on days 15 to 99 in comparison to placebo. In this double-blind, randomized, controlled trial the combination of Traumeel® and Zeel® Injection Solutions was shown to be a safe and effective treatment for pain in moderate to severe knee OA
- Trigger point injections for back and other musculoskeletal pain (often in combination with Spascupreel® Injection Solution or Neuralgo-Rheum® Injection Solution)
- Tender point injections alone or in combination with Spascupreel® for pain related to Fibromyalgia
- Injection of Traumeel® for pain related to rotator cuff syndrome
- Pain related to carpal tunnel syndrome
- Injection therapy of pain related to Tendinitis/Epicondylitis, ankle sprains, muscle strains and other common sport injuries
